Career Objective

Software Engineering student with strong interests in research, machine learning, and intelligent systems. Having completed all academic coursework and currently engaged in thesis research, seeking opportunities to contribute to academic and research-driven environments through analytical thinking, technical skills, and continuous learning.

Education

- | | |
|---|------------------------------------|
| Daffodil International University
B.Sc. in Software Engineering (Major in Data Science) | Dhaka, Bangladesh
Expected 2026 |
| – CGPA: 3.84/4.00 | |
| – Relevant Coursework: Machine Learning, Artificial Intelligence, Data Structures, Algorithms, Database Systems | |
| Mohila College, Chattogram
HSC (Science) | Chattogram, Bangladesh
2021 |
| – GPA: 5.00/5.00 | |
| Halishahar Cantonment Public School and College
SSC (Science) | Chattogram, Bangladesh
2019 |
| – GPA: 4.94/5.00 | |

Research Experience

- | | |
|---|---------|
| Tea Leaf Disease Classification and Pixel-Level Severity Grading through Dual CNN Models with Explainable AI and RAG Enhanced Agentic Advice | Ongoing |
| – Working on a computer vision research project focused on tea leaf disease classification and severity grading. | |
| – Collected, verified, and annotated image datasets for preprocessing and model training. | |
| – Applying deep learning and semantic segmentation techniques for disease analysis. | |
| – Exploring explainable AI methods and intelligent recommendation mechanisms for agricultural support. | |

Publications

- | | |
|---|-----------|
| MSRA-Net: An Efficient Deep Learning Architecture with Spatial Attention | EICT 2025 |
| – Conference paper presented virtually at EICT 2025. | |
| – Developed a deep learning architecture for Diabetic Retinopathy Classification from retinal images. | |
| – Designed spatial attention mechanisms to improve medical image classification accuracy. | |

Projects

- | |
|---|
| Eldercare Companion Platform (Full Stack) — GitHub |
| – Developed a full-stack web application using Django and React. |
| – Built RESTful APIs, authentication, and booking system functionalities. |
| – Designed responsive UI using HTML, CSS, JavaScript, and React. |
| Personal Finance Tracker (Java) — GitHub |
| – Developed a Java application for tracking income and expenses using OOP concepts. |

Certifications

AWS Academy Machine Learning Foundations	2025
Academic Writing for Research Excellence	2024

Technical Skills

Languages: Python, Java, SQL, JavaScript
Machine Learning: TensorFlow, Keras, CNN, Computer Vision
Web Development: Django, ReactJS, HTML, CSS
Data Analysis: Pandas, NumPy, Power BI
Tools: MS Word, MS Excel, PowerPoint, Git, GitHub, LaTeX, Roboflow

Soft Skills

- Time Management • Communication

Extracurricular Activities

CODETRAP-Competitive Programming and Problem Solving Competitions

- Participated in university and inter-university programming contests and problem-solving competitions.
- Strengthened analytical thinking and decision-making skills through competitive problem solving.
